## NEW RARE PLANT PHOTOS

The proposed new flora for the state will include photos of all plant species that are endemic to the state or that are listed as Rare by the New Mexico Rare Plant Technical Counsel. Following are examples of the rare plant photos acquired during the 2011 field season. The cover photo is of the rare state endemic *Synthyris oblongifolia*.

*Anulocaulis leiosolenus* var. *howardii*

*Cirsium inornatum*

*Erigeron rybius*

*Heuchera wootonii*

*Monarda humilis*

*Phacelia cloudcroftensis*

*Potentilla sierrae-blancae*

*Sedum integrifolium* subsp. *neomexicanum*

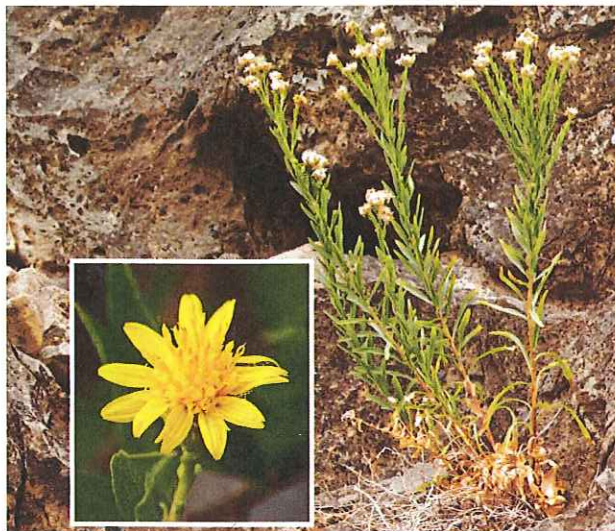

*Senecio sacramentanus*

*Silene scouleri* var. *grisea*

*Solidago wrightii* var. *guadelupensis*

*Thelypodopsis vaseyi*
