Dear Native Plant Society of NM folks:
Thank you so much for the grant of \$750 in support of my research. This funding will allow me to collect one more year of ~~an~~ data from the very important New Mexico sites of my historical ecology project. Given the high variability of bee populations from year to year in the Southwest, a third year of data will strengthen the results substantially - if patterns hold, the study tells an impressive story of changes in the sunflower pollinator community since the 1970s. I am looking →

forward to meeting with NMNPS members in November and discussing the 2017 results. Thank you very much for the invitation to present and for funding this research on pollinators of Native Sunflower.

Kindest regards,
Catherine Cumberland
PhD candidate
UNM Biology.
